Company Description

Planmac Engineering Inc. is an award-winning engineering consulting firm, providing a broad range of engineering and environmental services in the Province of Ontario, across Canada, and internationally for over 50 years in the civil, municipal, structural, and transportation fields.

Responsibilities

- Provide design and drafting on a variety of municipal, transportation and structural projects
- Assist with the preparation of engineering reports. Assist with the preparation of environmental assessment reports.
- Assist with the preparation of engineering cost estimates.
- Assist with the preparation of quantity estimates.
- Assist with the preparation of contract specifications.
- Assist with site review/inspections and project coordination as required
- Maintain electronic drawing file organization for projects and provide support for CAD file retrieval
- Adhere to MTO standards and other client requirements

Desired Qualifications & Skills

- College Certificate / Diploma in Engineering Technology or Degree in Civil Engineering (or equivalent education and/or designation)
- Experience in civil drafting / design, preferably with experience in municipal and/or transportation works (i.e. roads, highways, sewers, watermains, bridges, and/or transit-related infrastructure)
- Excellent knowledge of AutoCAD software

- Knowledge of other software is a strong asset (i.e. Civil 3D, MicroStation, AutoTURN, Power InRoads, Revit, etc.)
